

How DustLess® Works

WHY OUR PRODUCT IS ONE OF THE BEST ORGANIC DUST SOLUTIONS IN THE WORLD!

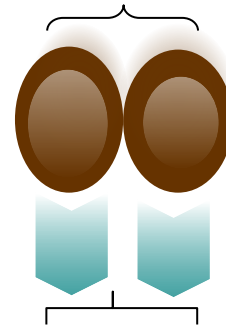

WHY A WATER or CHLORIDE DUST SOLUTION does not offer a
work safe or a cost-effective long-term dust solution and
requires multiple consistent applications at extra \$\$\$\$
24 hours/7 days per week to be effective on commercial work
sites globally:

Pull Moisture From The Air And Absorbed
Requires Multiple Applications/Year
Washes Away with Heavy Rain

DustLess migrates into each Micro-Dust Particle using a Touch chainlink reaction

DustLess & Dust Particles Do Not "Float" - BUT WATER DOES.

DustLess provides a Good Co-Efficient improvement by reducing of Ag particle friction & dust creation from the grinding down of Ag & dust particles.

The Benefits

No Stickiness or negative effect in surface vehicle tracking.

Low Level Dust Issues - Application dosage method will last between 4-6 months.

Higher Dust/Heavier Industrial Use - Application dosage will increase giving you a 6-12 month solution.

Include a Low-Level DustLess Maintenance Program - This can increase the lifespan of the dust solution and give you a 1-2+ year dust-free "Clean Air Environment"!
